

Permopoly Underlines &
Undermines *legal* Principles of
Precedence

US Revolution overthrew
British Domination with
Principles of Precedence

200 years later US trade
partners still under
influence of Principles of
Precedence
via Monroe Doctrine

2007: FAO Conference Interlaken

US claim 4% world = farmers

Retoric we heard in High School in
the late 1970's to describe US farm
situation inland

The FAO Conference Interlaken was
almost 40 years later

No UN Delegation attested to this certification

- The Conference Hall was full. I was there, sitting with the Libyan Consultation...it seems everybody was prepared to march to the American Drum.

Endemic US mobility = polarization of political policy

- The Big Sort (c.2008):: the more like minded people come together the more extreme their ideas become.
-this is an emergent quality of human nature.

Current Neural Research indicate
that communication has direct
consequences of brain development

So...communities with
increasing political polarity
are imprisoned in their
own human brain
physiology

Does TTIP attack; *endemic,*
homemade, Positive
Principles of Governance
with US Principles of
Precedence?

4% of the American population are farmers. Extrapolating this statistic on entire planet, extrapolates a vision that doesn't exist...unless the rest of the planet is coerced. That is an extravagant example of the power or precedence.

- **THIS IS ALSO THE KEY TO PERMOPOLY**

Permopoly sets Faith on the Power of Precedence

- AAre Talers, the currency of Permopoly is whole money that represents the average biodiversity that one aare Landscape under Permaculture care Evolve.

As Financial Systems wobble, and nations seek certainty in buying land in other nations...they neglect the very endemic diversity beneath their own feet.

*The average evolvable Biodiversity based on Permaculture Production requires thorough human reflection and implementation of all current technological knowledge. Genetic mapping, no genetic manipulation, low-tech energy plants, non-hierarchical small communities with good communication skills, part time work for all human beings age 12 and over, and an eye to water retention landscapes. These are the commodity products of the future. **We just need to stimulate the powers that be withPermopoly...***

Permopoly is resilient & up-to-date

16-18 Community Development &
16-18 Chance Cards

Ex: Ruby Mine find (NZZ April 2015)
in Mozambique hold logical
consequences

Permopoly relies on cooperation

Ex: Global Ecovillage Network

- Permopoly proceeds contribute to GEN Communities
- Swiss Up-Start Challenge Fach Hochschule Nord Windisch October 2015
- Open for other suggestions.

Contact sought to all organizations of Permopoly

- Help me find suitable contacts:
selected organizations are posted on
table

THANKYOU
